

Skyetones is an advanced Video Ringtone Enabling Technology for Symbian S60 devices.

The skyetones offering includes:

1. Symbian S60 Application
2. Skyetones content-wrapping

1. Symbian Application

The skyetones S60 Symbian application allows users to enable mobile format video files as a video ringtone that plays on receiving a call. The video content may be downloaded or recorded from the device camera.

Supported formats: 3GP, MP4
Supported video: H263, MPEG4
Supported audio formats: AMR, WB-AMR

2. Skyetones Content Wrapping

Skyetones videotone content-wrapping is a service offering to content aggregators, mobile network operators and other channel resellers.

Skyetones content-wrapping service is provided with various optional embedded functionality levels:

1. Level 1 - Video content + bundled player wrapping
2. Level 2 - Video content + bundled player wrapping + skyevault license management
3. Level 3 - Video content + bundled player wrapping + skyevault license management + WAP content link embedded
